**Subject:** Item 7 Supplemental FS Information Request - Editable FS Files

Chip and Kristine,

Per your email request dated November 20, 2013, LWG is providing to EPA Item 7 of the EPA supplemental information requests: "Native editable files for draft FS – Please provide the files (word etc, versions) to EPA". This includes the Word version of the text of the draft Feasibility Study (FS) including main text and appendices as well as the Excel files for the main text tables. These files will be delivered on a compact disk to Chip at the EPA Portland office later today.

We are providing this draft document to EPA in order to facilitate your comment process on the document. We understand that you will be making your changes in "redline" and providing those changes to LWG. We further understand that this "redline" process will replace the traditional EPA comment process on a line reference basis, and that LWG will be responsible for finalizing the draft FS, using the regular LWG/EPA process for resolving comments.

Note there is not an editable file for the Table of Contents. Since each of the main text sections was created separately, the overall table of contents is only available in PDF form. Also, there are numerous large excel spreadsheets in many of the various appendices. We request that EPA designate which appendix tables are desired (if any) and we can provide those as needed.

Finally, through providing this Word version of the text and Excel version of the tables, we seek EPA's concurrence that Item 7 of the November 20, 2013 EPA supplemental information request has been met. Please let us know if your understanding is different.

Let me or Jim know if you have any questions about the files.

Thanks.

**Carl Stivers**
